

EXAM MLC SUGGESTED STUDY SCHEDULE

November 2009 Exam

Exam MLC will be held Tuesday, November, 2009. This schedule has been created to allow time for a thorough coverage of the exam topics to be completed by mid-October. The final few weeks of intensive review should focus on working as many examples as possible to build up speed, accuracy, formula memorization and problem-type identification. In the schedule below, references are made to topics reviewed and problem sets in the Exam MLC Study Guide prepared by Prof. S. Broverman (SB sections), and references are also made to the exam catalog references.

AM - Actuarial Mathematics Book , JDP - J. Daniel study note on Poisson processes, and JDM - J. Daniel study note on multi-state transitional models
